I am writing to inform you of an urgent need to provide oversight to the intelligence community of the United States. My wife and I are being held inside of a false imprisonment at the command of Donald Trump. I am alerting congress in many different ways to the circumstances that are being forced upon our home since we began following the path of Donald Trump's efforts to be president in 2016 through the present day. Please relay this message to the rest of the members of the House Select Committee on Intelligence, and notify them that Donald Trump and rogue members of the intelligence community are using their access to advanced level technology to impose a 'behavioral modification and control' program over our life that includes a constant 'echo' of acoustic bombardment that evidences that we are being watched and monitored inside of our home at all times. Additionally, our movements are being monitored and interrupted at every location that we attempt to reach. We have traveled all the way to Spain seeking political asylum now and are being met by more and more aggressive criminals that are serving no other purpose than to interfere with the freedom of our movement and to provide a form of physical intimidation against me on a daily basis. I will continue to write in a more formal fashion to the committee, but the urgency of these circumstances is requiring that I begin notifying members of congress immediately. Donald Trump is exerting a criminal influence of forceful threat and intimidation over our life and this is a problem that has been continuing for several years now and appears to be escalating as I attempt stronger and stronger efforts to achieve a freedom from his unlawful restraint. Please help us by sharing this message to the Intelligence Committee and beginning to investigate the current use of behavioral modification and control programs in the United States and abroad.
